

Maintenance & Small Works Department

Small Works Mechanical Engineer Vacancy

About Us:

DBS are proud to be one of the most technically advanced Mechanical and Electrical Design, Build and Maintenance contractors in the UK. Operating from our Head Office in Newark, with a further office in Birmingham, we have worked on many high profile projects including Warner Brothers Studios, including the Harry Potter Tour, The National Football Academy, Centre Parcs complex in Woburn, The University of Northampton Waterside Campus and Unity Square in Nottingham for the HMRC.

To compliment our major project delivery, we also have a dedicated Small Works and Maintenance Division that carries out responsive and planned preventive maintenance as well as small project delivery to a wide range of clients.

About the role:

We currently have a vacancy for a Small Works Mechanical Engineer to work alongside our existing Mechanical & Electrical Project Engineers to generate, price and deliver a wide range of small works projects.

What we are looking for:

Within the Maintenance and Small Works Department you will be part of a team, taking ownership and having responsibility for securing and delivering a wide range of projects. You will also help to co-ordinate the site construction, commissioning and handover activities of M&E projects.

Duties Include:

- Reviewing suitable project enquiries as part of a team
- Assisting with pricing exercises to secure projects
- Liaising with specialist suppliers and sub-contractors
- Evaluating and comparing quotations and technical proposals
- Reviewing M&E design documentation with our in-house Design Department to ensure compliance with customer specifications and relevant standards
- Leading M&E disciplines on behalf of the site team in co-ordination / management of M&E construction activities
- Ensuring safe systems of work are in place for mechanical, electrical and process works
- Producing commissioning plans and supervising commissioning activities and handover
- Preparing and issuing sub-contract and supply only enquiry packages
- Ensuring company quality systems are in place and are adhered to
- Identifying changes and providing advice to the Commercial Department
- Risk management

Who We're looking for:

The successful candidate must be well presented, articulate and be able to communicate in a confident and professional manner. They will be able to work as part of a team but should also be self-motivated and able to work on their own initiative with minimal supervision.

Ideally the successful candidate should be able to demonstrate a sound working knowledge, and proven track record, within a small work contracting environment, ideally with a Mechanical Trade background. However, as a large M&E Design and Build Contractor, we have a number of colleagues who are able to offer advice and assist on projects as necessary, so if you are only starting out in your career, we would be happy to work with you to build on your existing skill sets.

Interested? Please email your CV and covering letter to info@derry-bs.co.uk
